

Instructions for the Process for handling deployment requests in constrained regions

Wednesday, September 25, 2024 10:30 AM

Customer

1. Complete Roadmap XLS Template:

- **Action:** Fill out the Roadmap XLS template (also referred to as the Capacity Planner) with all necessary information about the planned deployment, seeking review with the CSAM/CSA.
- **Details:** Include specifics such as project scope, resource requirements, timelines, and any other relevant details. Collaborate with the CSAM/CSA to ensure accuracy and completeness.

2. Validate Quota:

- **Action:** Check if the required quota is available.
- **Details:** Use the Roadmap XLS template to verify that the necessary quota is available to support the deployment. This step is visual task performed by the customer on their portal.

3. Need More Quota?

- **Action:** Determine if additional quota is required for the deployment.
- **Details:** Assess whether the current quota is sufficient. If more quota is needed.
 - Create a Support ticket in the Azure Portal with:
 - ◆ SKU families and quantities
 - ◆ Region,
 - ◆ Subscription destinations

4. Deploy Resources:

- **Action:** Attempt to deploy the necessary resources.
- **Details:** This involves initiating the deployment process using the resources specified in the Roadmap XLS template.

5. Escalate if Necessary:

- **Action:** If the deployment fails due to capacity allocation, escalate the issue or capacity request was not allocated or approved.
- **Details:** **Must** begin with a support ticket to Microsoft support, copying the CSAM/CSA for awareness. Escalate to CSAM/CSA , only after receiving response from support engineers, to assist with capacity escalation.

Microsoft CSAM/CSA

1. **Engage Capacity Team** (if capacity is not approved or a recommendation for another SKU is made):
 - **Action:** Involve the capacity team for further review and action.
 - **Details:** Share the capacity plan with the capacity team with any updates and collaborate with them to ensure all requirements are met.

Support/Capacity Team

1. **Review and Respond:**
 - **Action:** The capacity team reviews the request and provides a response.
 - **Details:** The team evaluates the capacity plan and either approves it or suggests modifications.
2. **Request for Quota or Alternatives?**
 - **Action:** Determine if additional quota or alternative solutions are needed.
 - **Details:** If additional quota or alternative solutions are required, communicate these back to the customer. If no issues are found, proceed with the signaling.

Customer

- **Complete Deployments:**
 - **Action:** Finalize the deployment process.
 - **Details:** Ensure all resources are deployed as planned and that the deployment meets the project requirements.

This detailed flow ensures that all necessary steps are taken to handle deployment requests in constrained regions, including the escalation process when required.
